1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lovell.

Lovell discloses a marine propulsion system having a rotary drive shaft 16, a casing 22, bearings 40, a housing 12, a removable cover 62, and a seal 75.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lovell.

Lovell does not disclose ball bearings. It would have been an obvious choice of engineering design to a person of ordinary skill in the art at the time the invention was made to form the bearings of Lovell in the form of ball bearings with races for improved shaft movement.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foreman shows a drive. Lindberg shows ball bearings. Hingerty shows bearings.
